PROFESSIONAL PROFILE

AI Specialist & Full Stack Engineer with 3+ years delivering production LLM systems, voice AI agents, workflow automation and data platforms. Currently the **sole developer at Luxury Properties Hub (LPH), Dubai**, taking systems from requirements with business teams through to deployment, monitoring and support — AI calling agents, n8n pipelines and a 40M+ record property data engine.

CORE TECHNICAL SKILLS

- **AI & LLM Systems:** OpenAI (incl. Realtime), Anthropic Claude, Amazon Bedrock, Ollama, LangChain, LlamaIndex, LangGraph, RAG, Agentic Workflows, Prompt Engineering
- **Voice AI & Telephony:** Retell AI, LiveKit Agents, Telnyx SIP & Voice API, Real-time Audio Streaming
- **Automation & Integrations:** n8n, Webhooks, Google Sheets API, Microsoft Graph, Brevo, Chrome Extensions (MV3)
- **Data & Databases:** PostgreSQL, MongoDB, FAISS, Python ETL (pandas), Entity Matching & De-duplication
- **Languages & Frameworks:** Python, TypeScript, JavaScript, Java, FastAPI, React, Node.js
- **Cloud & DevOps:** Docker, Easypanel / VPS, AWS (Lambda, S3, Bedrock), CI/CD (GitHub Actions)

PROFESSIONAL EXPERIENCE

- AI Specialist** | Luxury Properties Hub (LPH), Dubai Jul 2026 – Present
- Own the full delivery cycle for every in-house system — requirements, architecture, build, release and support.
 - Run the self-hosted production stack (Docker, n8n, PostgreSQL) with logging, retries and alerting so unattended jobs fail safely.
 - Scope, demo and roll out automation with sales, marketing and management, with docs for non-technical users.
- Software Engineer – AI/ML** | Anvaaya Healthtech Pvt Ltd Nov 2025 – May 2026
- Integrated an AI chatbot improving response time ~35%; built AI modules improving data accuracy ~25%.
 - Led an architecture migration that cut page load time ~40% and supported AI adoption across teams.
- Full Stack & AI Developer (Freelance)** | BTB Academy May 2025 – Mar 2026
- Built a trading academy platform end to end — CRM, LMS, PAMM portal and trading journal — with live MT4/MT5 WebSocket feeds.
 - Shipped iteratively with the business, adding modules, broker integrations and UX improvements as the academy grew.
 - Built an AI investor-outreach pipeline (Anthropic API) and role-based PAMM module with automated profit distribution.
- Backend & AI Assistant Developer** | Remote — Client Projects, Dubai & India Jan 2023 – Aug 2025
- Built 3+ AI-assisted client platforms using LLMs, RAG pipelines and vector search, deployed as containerised services on AWS.
 - Delivered secure REST APIs (JWT auth, validation, rate limiting) and documentation for client handover.

SELECTED PROJECTS

- AI Voice Calling Agents** — Retell AI, LiveKit, Telnyx SIP, OpenAI Realtime, FastAPI, n8n
- Built outbound voice agents calling back US investors and owners, with per-lead variables and transcripts, summaries and sentiment written back to the sheet.
 - Engineered a Telnyx ↔ OpenAI Realtime media bridge in FastAPI to cut reply latency, with call windows and webhook logging.
- Property Ledger — Real Estate Data Engine** — Python, PostgreSQL, FastAPI, React
- Architected the core engine — field mapping across 1,700+ source files, owner/unit matching and de-duplication — and built the pipeline loading 40M+ records into PostgreSQL.
 - Built a React dashboard (search, ledger, batch explorer, analytics) so non-technical staff can upload raw files and get clean, deduplicated data.
- Sales & Marketing Automation** — n8n, Claude API, Ollama, Microsoft Graph, Google Sheets, Brevo
- Personalised outbound email pipeline: LLM output validated as JSON before sending, with sheet-driven eligibility, test mode, status write-back and duplicate protection.
 - Automated agent deal tracking (WhatsApp → n8n → ranked leaderboards) and AI-made branded social carousels.
- WhatsApp Web Chrome Extensions** — TypeScript, React, Vite, Chrome MV3
- **Property Intelligence:** classifies incoming developer brochures, price lists and job applications into a factsheet queue.
 - **Group Cleanup:** bulk offboarding across 100+ groups, with identity matching, admin safeguards, live verification and an audit log.
- Bulk Image Processing Pipeline** — Chrome Extension, n8n, AI Image Models, Google Drive API
- One-click capture of a full image set from a page, queued into an automation workflow for batch AI processing and automatic delivery of the finished files to a shared Google Drive folder.
- Custom CRM Platform** — Full-stack web application
- Designed and built a CRM centralising leads, client records and follow-up reminders, replacing manual spreadsheet tracking.

EDUCATION

Bachelor of Engineering (B.E.) – Computer Science & Engineering Graduated: July 2025
East Point College of Engineering & Technology, Bengaluru (Visvesvaraya Technological University) · CGPA: 7.66
